MCC BOUND LEGENDS LLC

HOMEPAGE REVISION & DEVELOPER INSTRUCTIONS

Developer Implementation Brief

Reference: current homepage viewed at 100% zoom in Google Chrome

Website: mcc-bound-legends.vercel.app

Prepared: October 7, 2026

PROJECT DIRECTION

Refine the existing MCC Bound Legends homepage - do not redesign it from scratch. Preserve the current brand identity, improve readability, spacing, hierarchy, responsiveness, and the relationship between pictures and content.

Implementation Priorities

Complete the items below first. These have the largest impact on the homepage at 100% desktop zoom.

Priority	Area	Required action
P1	**Top bar and header spacing**	Widen the utility bar and main header on all pages; increase text size and reduce visual clutter.
P1	**Hero rewrite and layout**	Use the new H1, remove the old hero trust content and "Moving America Forward" copy, and rebuild the hero as a clean left-content / right-form layout.
P1	**Readability**	Raise undersized text throughout the page. Do not use 9-10px for meaningful content.
P1	**Fix the large white gap**	Remove the excessive empty space between the dark trust section and the next content section.
P1	**Move nationwide coverage higher**	Place the Coast to Coast / All 50 States section directly after the right-trailer section.
P2	**Service and trust cards**	Shorten copy, increase headings/body sizes, and ensure every card uses a relevant image or icon.
P2	**Remove boat-only homepage CTA**	Keep the general homepage focused on all transport categories. Move boat-specific banner content to the boat page.
P2	**Responsive QA**	Check desktop, tablet and mobile so headings do not overflow and spacing does not become excessive.

SECTION 1

Global Scope and Design Direction

Apply the spacing and readability improvements consistently across the homepage and, where noted, across all pages.

- **Keep the existing brand:** dark navy, white, bright blue accents, orange CTA buttons, transportation photography and bold headings.
- **This is a refinement:** do not throw away the current homepage or rebuild it into a completely different visual system.
- **100% zoom reference:** all readability decisions should be checked at normal desktop viewing size in Google Chrome.
- **Responsive requirement:** verify desktop, tablet and mobile. Do not allow headings to overflow, body copy to become difficult to read, or spacing to become excessive.

SECTION 2

Very Top Utility Bar

- The current top utility bar and main header are too close together and feel cluttered. Widen the spacing on ALL pages, including the main homepage.
- Increase utility bar height to approximately 30-34px.
- Use approximately 12-13px text. Do not allow the information to appear tiny or unreadable.
- Keep the bar simple and evenly spaced.

SUGGESTED UTILITY BAR CONTENT

(888) 785-0028
Nationwide Transport
Licensed & Bonded
Mon-Fri 8 AM-6 PM ET
Social links
Putting Trust in Motion

SECTION 3

Main Header and Navigation

- Keep the current general header structure and logo.
- Change the supporting header wording from "Nationwide Vehicle Shipping" to "Nationwide Transportation."
- Increase navigation readability and maintain consistent spacing. The current navigation is too compressed.
- Navigation text target: 14-15px, medium/semi-bold.
- Main header height target: approximately 70-80px.

- Keep the phone number clearly visible.
- Change the orange CTA from "FREE QUOTE" to "GET A FREE QUOTE."
- Keep a clear call button: "CALL (888) 785-0028."
- Buttons should be prominent without looking oversized.

SECTION 4

Hero: New H1, Supporting Copy and CTA

NEW HERO COPY

Eyebrow: NATIONWIDE VEHICLE AND EQUIPMENT TRANSPORT

H1: NATIONWIDE CAR, BOAT & EQUIPMENT TRANSPORT

Supporting paragraph: Reliable transportation for cars, commercial vehicles, boats, RVs, motorcycles and heavy equipment across all 50 states.

Secondary supporting line: MCC Bound Legends coordinates your shipment with vetted carriers and equipment matched to your vehicle, dimensions and route.

- H1 desktop target: approximately 48-56px. Do not let the H1 overwhelm the left side.
- Eyebrow target: 12-14px, bold uppercase with letter spacing.
- Supporting paragraph target: 17-18px with comfortable line spacing.
- Primary button: GET MY FREE QUOTE.
- Secondary button: CALL (888) 785-0028.
- Button height target: approximately 48-52px.
- Button text target: 15-16px bold.
- Do not hard-code one H1 size everywhere. Longer headings may scale slightly; keep the hierarchy consistent and responsive.

SECTION 5

Hero Layout Cleanup

- Completely remove the existing "Fast Response Times / Nationwide Coverage / Verified Carrier Insurance / Right Trailer" hero content.
- Remove "Moving America Forward / One Shipment at a Time" from this hero area.

- Do not leave an empty container, reserved column, width, padding, margin or spacer where the removed content currently exists.
- Rebuild the hero as a clean two-column layout: LEFT = H1, supporting copy and CTA buttons. RIGHT = quote form.
- Move the quote form farther to the right side of the hero container. Use the width created by removing the middle content.
- The quote form should align with the right edge of the main website content area rather than floating toward the center.
- On tablet, keep balanced spacing. On mobile, stack the content and form cleanly.

SECTION 6

Hero Quote Form

- Keep the quote form on the right side of the hero.
- Keep the quote card visually integrated with the hero rather than making it feel like a separate section.
- Increase all small form text and legal/disclosure copy for readability.

Element	Desktop target
Form heading	22-24px
Description	14-15px
Inputs / placeholders	14-16px
CTA button	15-16px bold
Fine print / legal	11-12px minimum

SECTION 7

Seven Main Service Cards

- Keep this section directly underneath the hero.
- Keep all seven main categories.
- Each card must have its own correct image that clearly represents the service. Do not use unrelated or repetitive transport pictures.
- Keep descriptions short and allow the image to remain the main visual element.
- Card heading target: 15-17px bold. Description target: 12-14px.

SERVICE CARDS

Auto Transport - Cars, SUVs, pickups, classics and luxury vehicles

Commercial Vehicle Transport - Box trucks, work trucks, vans, buses and fleets

Boat & Yacht Transport - Center consoles, yachts, pontoons, sailboats and PWC

RV & Motorhome Transport - Class A, B and C motorhomes, travel trailers and RVs

Motorcycle & Powersports - Motorcycles, ATVs, UTVs and side-by-sides

Construction Equipment - Excavators, skid steers, bulldozers and forklifts

Heavy Equipment - Oversized and specialized machinery

SECTION 8

Stats Banner: 50 States / 7 Categories / $0 Deposit / 5-Star

- Keep this banner; the information is useful.
- The banner is currently too compressed vertically.
- Increase banner height to approximately 90-110px.
- Number/stat target: 30-36px.
- Label target: 13-15px.
- Keep the four statistics evenly spaced and immediately readable at 100% zoom.

SECTION 9

Dark Trust Banner: More Than Transport

HEADING

MORE THAN TRANSPORT.

A PARTNER YOU CAN TRUST.

- Keep this section, but give the content more room.
- Main heading target: 34-40px.
- The benefits beside the headline are currently too small and compressed.
- Use four strong benefit points only. Benefit headings: 15-16px. Supporting text: 13-14px.

FOUR BENEFIT POINTS

Fast Response Times - Quote assistance from a real transport coordinator.

Nationwide Coverage - Transportation coordination across all 50 states.

Verified Carrier Insurance - Carrier coverage verified before dispatch.

Equipment Matched to Your Load - Trailer/equipment selected according to actual dimensions and weight.

SECTION 10

Remove the Large White Gap

- This is one of the highest-priority fixes.

- There is a very large blank white area between the dark trust section and the next content section. It makes the homepage look broken or as if something failed to load.
- Inspect fixed heights, min-height, section padding, margins, empty containers and desktop breakpoints.
- Target normal section spacing: approximately 70-100px, not hundreds of pixels.

SECTION 11

Right Trailer for Every Move

REPLACE THE CURRENT SECTION HEADING WITH

THE RIGHT TRAILER FOR EVERY MOVE

- Keep this expertise section.
- Increase supporting body copy to approximately 16-17px.
- Suggested copy: A sedan, box truck, boat, motorhome and excavator do not use the same transportation equipment. We evaluate dimensions, weight, operating condition, ground clearance, loading requirements and route before coordinating the carrier.
- The image on the left and the content on the right must feel like one section.
- Vertically align the two sides and make their heights feel intentional.
- Do not let the image feel disconnected from the content.
- Enlarge the small labels/cards on the right so they remain readable at 100% zoom.

SECTION 12

Coast to Coast. Every State. - Move Higher

- Keep the existing dark navy / U.S. map design. This is one of the strongest visual sections on the current homepage.
- Move this section directly after "The Right Trailer for Every Move." Nationwide coverage should not be buried near the bottom.
- Heading: COAST TO COAST. EVERY STATE.
- Supporting copy target: 15-17px.
- State/route information target: 13-14px minimum.
- Clearly state ALL 50 STATES so visitors do not interpret a short state list as limited coverage.

COVERAGE WORDING AND POPULAR LANES

Nationwide Transport Across All 50 States

Florida-Based. Nationwide Reach.

Florida <-> Northeast

Florida <-> Texas

Florida <-> California

Northeast <-> Southeast

Coast-to-Coast

SECTION 13

Specific Vehicles and Special Situations

- Keep the "Specific Vehicles. Specific Pages." concept and visually connect it to the special-situations section beneath it.
- Keep the heading "NON-RUNNING? AUCTION? NO TRAILER?" - it is strong and attention-grabbing.
- Make the cards easier to read and avoid overly small copy.
- Use clear icons/images with short descriptions.
- The two sections should feel like one continuous service-navigation area, not unrelated mini-sections.

SPECIAL SITUATIONS

Non-Running Vehicles

Auction Vehicles

Boats Without Trailers

Enclosed Transport

Oversized Equipment

Fleet Transport

SECTION 14

Also Coordinated Links

- The small internal links under this area are currently too small.
- Increase these links to at least 12-14px.
- All links must be clickable and must point to the appropriate service pages.
- Do not make SEO/internal navigation links look like legal fine print.

SECTION 15

Trust, Expertise, Communication, Planning

- Keep the six-card concept, but shorten the content.
- Each card should contain a heading and no more than one or two short sentences.
- Card heading target: 16-18px.
- Body copy target: 14-15px.
- Do not cram long paragraphs into small cards.

RECOMMENDED CARD COPY

Authority & Insurance Verification - We verify active carrier authority and cargo insurance before dispatch.

Equipment Matching - The carrier and trailer are selected based on the shipment's real specifications.

Direct Communication - Clear communication from booking through delivery.

Transport Planning - Dimensions, weight, loading and route are considered before dispatch.

Carrier Network - We work with vetted transport professionals nationwide.

One Point of Contact - Customers are not passed around between multiple departments.

SECTION 16

Simple. Planned. Communicated.

- Keep the three-step concept.
- Make the numbers 01 / 02 / 03 larger and easier to scan.
- Step headings: 18-20px.
- Descriptions: 14-15px.
- Keep the section simple and not text-heavy.

THREE-STEP PROCESS

STEP 1 - Tell Us What You're Shipping: Share the vehicle/equipment details, pickup and delivery locations.

STEP 2 - We Plan & Match the Right Carrier: We review the shipment requirements and coordinate appropriate equipment.

STEP 3 - Pickup, Updates & Delivery: Receive pickup coordination, transportation updates and delivery communication.

SECTION 17

Individuals and Businesses

- Keep this section, but add imagery. The current white boxes are visually plain.
- Create two strong cards - one for Individuals and one for Businesses.
- Do not overload either card with paragraphs. Use a relevant image plus a concise list.

INDIVIDUALS

Use a private customer vehicle/boat/transport image.

Relocations

Snowbirds

Auction Buyers

Specialty Vehicle Owners

BUSINESSES

Use a commercial/dealership/fleet/equipment image.

Dealers
Fleets
Contractors
Marinas
Equipment Dealers
Service Departments

SECTION 18

Customer Reviews

- Keep the dark review section; the overall design works.
- Heading: REAL SHIPMENTS. REAL PEOPLE.
- Make the heading slightly larger.
- Testimonial text target: approximately 16-18px.
- Show approximately three strong reviews at a time.
- Keep Google / Trustpilot credibility where appropriate.
- Reviews should be readable without zooming or leaning into the screen.

SECTION 19

FAQ - Straight Answers

- Keep this section near the bottom of the homepage.
- Heading: STRAIGHT ANSWERS.
- Increase the introductory paragraph; it is currently too small.
- FAQ question target: approximately 15-16px.
- Keep answers concise.

FAQ TOPICS

Are you a broker or a carrier?
Is there an upfront deposit?
Is my shipment insured?
Do you guarantee pickup and delivery dates?
How far in advance should I book?
Can you transport oversized equipment?
Can you transport a boat without a trailer?

SECTION 20

Final General CTA Banner

- Keep the general homepage CTA:

- READY TO MOVE IT? GET YOUR FREE QUOTE.
- Make the banner slightly taller and more prominent.
- Primary button: GET MY FREE QUOTE.
- Secondary button: CALL (888) 785-0028.
- No unnecessary extra wording is needed.

SECTION 21

Remove the Boat-Specific Banner from the Homepage

- Remove the lower "Ready to Ship Your Boat?" banner from the general homepage.
- Move that boat/waterfront content to /boat-transport-florida/.
- The general homepage represents cars, commercial vehicles, boats, RVs, motorcycles, construction equipment and heavy equipment. It should not suddenly turn into a boat-specific page at the bottom.

SECTION 22

Global Desktop Typography System

Element	Desktop target
H1	48-56px
Main H2	32-40px
H3 / card heading	17-22px
Main paragraph	16-18px
Card description	13-15px
Navigation	14-15px
Button text	15-16px
Eyebrow heading	12-14px
Footer links	13-14px
Fine print	11-12px minimum

- Do not use 9px or 10px text for meaningful content.
- Readability comes before fitting more information on one screen.
- If a section needs to become slightly taller to make the content readable, make it taller.
- These are target ranges, not rigid fixed sizes. Adjust responsively while maintaining the hierarchy.

SECTION 23

Spacing and Layout QA

- Audit margins, padding, section heights, fixed heights, min-height, vertical alignment and card spacing across the entire homepage.
- There are areas with too much empty space and other areas where information is squeezed together.
- All major sections should have a consistent vertical rhythm.
- Recheck the top utility bar, main navigation, stats banner, dark trust banner, nationwide coverage banner and final CTA at 100% zoom.

SECTION 24

Pictures and Content Must Work Together

- This is a key visual requirement.
- The picture beside a section must directly support the subject of that section.
- Use alternating layouts where appropriate: IMAGE | CONTENT, then CONTENT | IMAGE, then IMAGE | CONTENT.
- Do not use a generic transport picture beside copy that describes a completely different service.
- Every major image should reinforce the message before the visitor even reads the text.

SECTION 25

Final Acceptance Checklist

[ ] Top bar and main header have more breathing room on all pages.

[ ] Header wording says "Nationwide Transportation."

[ ] New homepage H1 and supporting hero copy are implemented.

[ ] Hero is a clean two-column layout; removed middle content leaves no blank spacer.

[ ] Quote form is aligned farther right and remains responsive.

[ ] No meaningful content uses 9-10px text.

[ ] Seven service cards remain directly under the hero with correct images.

[ ] Stats banner is taller and readable.

[ ] More Than Transport section uses four concise benefits.

[ ] Large white gap has been removed.

[ ] "The Right Trailer for Every Move" section is aligned and readable.

[ ] Coast to Coast / All 50 States section has been moved higher.

[ ] Special-situation and internal-link areas are readable and clickable.

[ ] Trust / expertise cards use concise copy and larger text.

[ ] Three-step process is simple and easy to scan.

[ ] Individuals / Businesses section includes relevant imagery.

[ ] Review and FAQ text is readable at 100% zoom.

- [ ] General CTA remains; boat-specific homepage banner is removed.
- [ ] Desktop, tablet and mobile have been tested for overflow and excessive spacing.
- [ ] The finished page still looks like MCC Bound Legends - refined, not replaced.

FINAL DIRECTION

Preserve the MCC Bound Legends identity. The goal is bigger readable text, less clutter, better spacing, stronger hierarchy, cleaner banners, better picture/content relationships, consistent typography, clear nationwide positioning and a more professional overall presentation.
